Industry Supplement to "Doing Business in Mexico"

June 2002

This information has been prepared for the project "Perspectivas México" (Internet: <http://www.perspectivas-mexico.ch>).

It supplements the information provided in the book "Doing Business in Mexico" by Thomas A. Zimmermann (Chur/Zürich: Rüeggerverlag, 2002, ISBN 3-7253-0725-3).

Project “Perspectivas México”

<http://www.perspectivas-mexico.ch>

This publication is the result of a joint effort undertaken by business associations, public institutions and individual corporations in Mexico and Switzerland. The objective of the project is to encourage Swiss small and medium-sized enterprises (SMEs) to have a closer look at the potential of Mexico and to provide interested SMEs with relevant information and advice for the development of their business activities in Mexico.

Project Leaders and Editors

Latin American Chamber of Commerce in Switzerland
Swiss Institute of International Economics and Applied Economic Research

Project Sponsors

Swiss State Secretariat for Economic Affairs (seco)
OSEC Business Network Switzerland
sia Abrasives

Institutional Project Partners

Mexican Embassy in Switzerland
Swiss Embassy in Mexico
Consejo Mexicano de Comercio Exterior, A.C. (COMCE)
Asociación Empresarial Mexicano Suiza, A.C. (AEMS)
economiesuisse – Swiss Business Federation
FASMED – Federation of Swiss Medical Devices' Trade and Industry Associations
Swissmem – The Swiss Mechanical and Electrical Engineering Industries
Swiss Society of Chemical Industries (SGCI/SSIC)
Cantonal Chambers of Commerce and Industry

Corporate Project Partners

Sectoral Trade Data and Market Access Tables: Introduction

The following pages contain data on trade and market access by commodity group or individual product. They shall enable Swiss SME representatives to briefly make a first assessment of the evolution of Mexican import demand for specific products, main foreign suppliers and market access conditions under the Free Trade Agreement. **Please read the following explanations carefully. Please note that all this information is subject to the disclaimer on page 3 of this industry supplement.**

1.) The first line of each table contains the code (HS Code) and description of the merchandise according to the Harmonised Commodity Description and Coding System (HS). The Harmonised System is a multipurpose international product nomenclature. Each table is dedicated to a commodity group on the 6 digit level of the system. **The only relevant description for exports to Mexico is the Spanish language description in the third column.** Where the Spanish description was simply "Los demás"/"Las demás" (= "Others"; possibly in conjunction with further precisions), we usually repeated for readers' convenience the major heading to which the expression "Others" relates. Where we found an additional English and/or German language description, it has been added for pure informational purposes and for the convenience of readers (see second and fourth column respectively). Please note that we retrieved the German language descriptions from a database which was limited to a small number of characters. We are therefore unable to provide the full entry, which is indicated by "...". Data Sources: Oberzolldirektion/Swissmem, U.S. International Trade Commission, Sistema de Información Comercial Vía Internet (SICVI; Secretaría de Economía).

2.) The second line ["Swiss Exports 2001"] provides data on the value of annual Swiss exports of each HS 6-digit commodity group in millions USD in 2001. Data is provided for total Swiss exports, for Swiss exports to the U.S., and for Swiss exports to Mexico. Please notice that not all exports of a certain commodity group are necessarily captured by data, because some transactions are regarded as confidential and are therefore summarised in specific HS 6-digit positions ("Vertrauliche Transaktionen"). This usually occurs if there is only one provider of a certain good, and trade data would therefore allow inferences about that company's volume of sale and/or prices. Data Source: Oberzolldirektion/Swissmem.

3.) The third line [MX Tot. Imp. (USD)] provides data on the value of total annual Mexican imports of each HS 6-digit commodity group between 1996 and 2001. It helps to assess the magnitude and variability of Mexican import demand. Data Source: Sistema de Información Comercial Vía Internet (SICVI; Secretaría de Economía).

4.) The fourth line [MX origin of imp. 2001] lists the shares of the six major countries of origin for imports of each HS 6-digit commodity group in 2001. This information helps to identify main competitors in a given market segment. From there, inferences may be possible with regard to the quality level prevalent on the specific market. For each country of origin, the ISO Code and its share in Mexican imports is listed. For a list of ISO

Codes, please refer to <http://www.iso.ch/iso/en/prods-services/iso3166ma/02iso-3166-code-lists/list-en1.html>. Data Source: Sistema de Información Comercial Vía Internet (SICVI; Secretaría de Economía).

5.) The fifth line [Tariff Rates CH] offers information on the tariff rates applied to products of Swiss origin which fall into the respective HS 6-digit commodity group. Products are listed at the (internationally non-harmonised) national 8-digit level of the Mexican customs tariffs which is used by Mexican customs authorities. Tariffs applied to imported products of preferential Swiss origin at a given time depend on the Mexican base rate, the category of elimination and the year in which these imports occur. These categories and their tariff elimination schedules are set out below:

- Tariffs on goods listed in category "A" of the FTA have been fully eliminated with the entry into force of the FTA on 1 July 2001.
- Tariffs on goods listed in category "B" of the FTA have been reduced to 50% of the base rate upon entry into force and to 25% of the base rate on 1 January 2002. They will be fully eliminated on 1 January 2003.
- Tariffs on goods listed in category "B+" of the FTA will be eliminated by 1 January 2005. The reduction will proceed as follows:

Mexican Base Rate (Tasa Base)	2001	2002	2003	2004	2005
20	12	8	5	2.5	0
15	10	7	5	2.5	0
10	6	4	4	2	0
7	4	3	2	1	0
5	3	2	2	1	0

- Tariffs on goods listed in category "C" of the FTA will be eliminated by 1 January 2007. The reduction will proceed as follows:

Mexican Base Rate (Tasa Base)	2001	2002	2003	2004	2005	2006	2007
20	12	8	5	5	4	3	0
15	10	7	5	5	4	3	0
10	6	5	4	4	3	1	0
7	4	3	3	2	2	1	0
5	3	2	2	2	1	1	0

Special provisions apply to very few goods listed in categories "1/" or "C 2/" of the calendar. They shall not be explained here in detail. For details, see Section 6.1 of "Doing Business in Mexico". Please note that the Free Trade Agreement contains a provision that enables the "Joint Committee" of the Free Trade Agreement to accelerate the tariff elimination if economic conditions permit. Tariffs may therefore turn out to be lower than established according to the tables above. For further information, please check Chapter 6 of "Doing Business in Mexico". Data Source: Tratado de Libre Comercio Mexico – Asociación Europea de Libre Comercio; Calendario de Desgravación (México).

6.) The sixth line [Specific Norms] includes information on specific Mexican technical norms (NOMs) which apply to individual products that fall into the HS 6-digit commodity group. We have relied on information provided in the "Acuerdo que identifica las fracciones arancelarias de la Tarifa de la Ley de los Impuestos Generales de Importación y de Exportación en las que se clasifican las mercancías sujetas al cumplimiento de las normas oficiales mexicanas en el punto de su entrada al país, y en el de su salida." that has been published on 27 March 2002 in the Diario Federal (for details on technical norms, see Section 6.3 of "Doing Business in Mexico"). All products which are listed in the "Acuerdo" must be accompanied by NOM Certificates when they cross the border. The fact that a product has not been listed, however, does not necessarily imply that it is not subject to specific norms or regulations. As technical import requirements frequently change and their administration may be opaque, **it is strongly recommended that exporters review in co-operation with an experienced Mexican customs broker the current classification of their products and any technical requirements for imports of the product to Mexico.**

Changes to the Harmonised System: The Harmonised System is reformed periodically (i.e. every four to six years) in order to incorporate changes which become necessary, for instance, because of technological progress. Such a reform entered into force in early 2002 when several positions of the HS changed from its previous 1996 version. The changes to the Mexican system were published in the Diario Federal on 18. January 2002. While we tried to use only the most current data, several of our sources (including the free trade agreement and the tariff elimination schedule) have not yet been adapted to the changes so far. **Exporters should carefully check if any changes in the HS position apply to their product, including the consequences for market access.**

It is exporters' sole responsibility to check which import regulations (such as import license requirements, countervailing duties, tariffs, rules of origin, technical norms etc.) apply to their product(s).
